

SERVICE LEARNING POLICY

It is the Raymond School District's belief that all students and teachers must connect with the community to meet its needs as well as the schools needs.

In order to provide support and opportunities for students, teachers and the community to work together, the Raymond School Board endorses a Service Learning Program. This will enable both students and teachers to reach beyond the classroom and grow through active participation in community issues. Service Learning will also enhance student performance.

This curriculum-based program will increase student achievement, support hands-on learning, broaden curriculum and promote a sense of pride and accomplishment in each participant.
