Projects

→ Camera Systems
→ Tutor.com
→ Grant Funded Security Training- Coming soon!
→ Grant Funded 2 Factor Authentication- Yubikeys
→ Acadience Rostering & Setup
→ CloudFlare: Project Cybersafe Schools

CloudFlare

Project Cybersafe Schools

Zero Trust email security and Gateway DNS filtering for small K-12 public school districts in the United States

Bringing security tools for free to small K-12 public school districts in the US

Cloudflare is excited to introduce Project Cybersafe Schools. Announced as part of the Back to School Safely: K-12 Cybersecurity Summit at the White House on August 8, 2023, Project Cybersafe Schools will support eligible K-12 public school districts with a package of Zero Trust cybersecurity solutions — for free, and with no time limit. These tools will help eligible school districts minimize their exposure to common cyber threats.

These offerings to eligible school districts will be at no cost, with no time limit, and can be used as a technology protection mechanism for Children's Internet Protection Act (CIPA) compliance.

Student Data Privacy

House Bill 1612 (HB 1612)

Minimum standards for privacy and security of student and employee data

Per 2018 HB 1612, the Department of Education is required to establish minimum standards for privacy and security of student and employee data, based on best practices, for local education agencies.

To comply with this legislation, the Department in collaboration with the Department of Information Technology, has developed minimum standards document.
