Revenue ideas

- Increased ala carte options at IHGMS and RHS
- Introducing kid friendly “Munchable” lunches to Elementary
- Connecting with PTO to explore catering opportunities
- I am attending Staff meetings at all schools to introduce myself to teachers and staff and make them aware of opportunities to collaborate.

LRES has been selected to participate in the Fresh Fruit and Vegetable Program. The program provides funds outside of the NSLP program to offer a variety of fruits and vegetables to elementary students in higher free and reduced areas. The program aims to increase consumption of fruits and vegetables, expanding access and promoting healthy eating. This program began on October 1st and will continue with current funding until september 30th 2023.

Technology Upgrade coming 10/19/22. Mosaic will be replacing Nutrikids as our software for point of sale. The implementation will occur starting October 19th. In addition to being more secure from a hardware perspective the software also comes with many helpful features to help ensure compliance with the meal pattern regulations and menu planning.
