Patrick Arseneault, Director of Youth Services

October 2023

I respectfully present our school budget for the 2024-2025 school year. Directors and principals came together to develop this budget collaboratively. We created this budget with common goals in mind while also trying to be fiscally mindful.

This year in particular we are facing some financial challenges due to healthcare. This challenge is shared across the state but even more so here in Raymond. It is our goal that this budget meets the needs of our students and continues to move the district in a positive direction. Our leadership team continues to monitor class size, support professional development, and provide the necessary resources for our students and staff.

We intend for our students and schools to be the pride of our community. As a school community, we will continue to work towards these goals. In addition, as a school community, we will continue to work to ensure we meet students' needs academically and their social emotional needs as well.

Our 2024-2025 budget will support our mission and vision goals and support our District's strategic plan. It is our goal to create a safe and healthy learning environment for our students and staff.

Sincerely,

Terry Leatherman
Superintendent
