After meeting with the bidders to answer clarifying questions, we were very impressed with the Turing system proposed by Interval Technologies. We asked if they would be willing to adjust the number of cameras, and change some of the equipment to align with our current infrastructure, which would make it easier for us to configure. Their updated quote came in at \$109,081.63. We are asking the School Board to approve up to \$115,000 to allow for any unforeseen issues that may happen during installation.
