---

October 2022

I respectfully present our school budget for the 2023-2024 school year. Department heads and principals came together to develop this budget collaboratively. We created this budget with our common goals in mind while also trying to be fiscally mindful.

As a country, state and community we are facing some tough decisions financially. It is our goal that this budget meets the needs of our students and moves the district in a positive direction. Our leadership team continues to monitor class size, support professional development and provide the necessary resources for our students and staff.

We intend for our schools to be the pride of our community. We understand to have a successful community we need to be a successful school. As a school community, we will continue to work towards these objectives. As a school community, we will continue to work to ensure we meet students' needs academically and their social emotional needs as well.

Our 2023-2024 budget will support our mission and vision goals and support the District's strategic plan. It is our goal to create a safe and healthy learning environment for our students and staff.

Sincerely,

Terry Leatherman  
Superintendent
