An analysis was done at the SAU comparing the above figures to what was used in regards to gallons used in FY18-19. Usage was not used for 19-20 because of less usage due to the pandemic. When this was done, it was shown that \$2,369 would be the price differential between Palmer & Broco. With that being said, we have a great working relationship with Palmer and they allow our Employee's to get a lower cost for using them because they are Employee's of the District. Their proximity was also taken into account.
