# Superintendent's Message

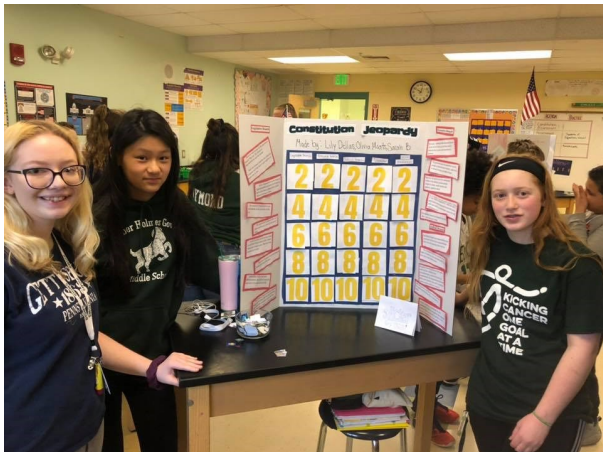

---

This Raymond School District Annual Report Card is intended to provide all stakeholders with an overview of the accomplishments, changes and challenges that occurred during the 2018-19 school year. It highlights the achievements of our students, the notable events that took place, and efforts of employees to improve the quality of educational experiences provided to all students in our community. With the support of parents, administrators, and the School Board, our teachers continued the transition toward competency based grading at all levels. The entire District is striving to improve rigor, relevance and engagement for all students, using competency based education as a common lens to focus and organize collective efforts. Our goal for every student is to ensure that he or she leaves our school system with the skills, knowledge and dispositions needed to excel in life.

This document also includes data key to understanding our District. Please take a few moments to peruse it and become more familiar with our school system and how it has performed over time. Under the governance of the Raymond School Board, the District continues to take significant steps to move forward while being very mindful of the needs and concerns of taxpayers. I am very grateful for the continued opportunity to serve as the educational leader of the Raymond School District, and look forward to new and exciting challenges ahead.

Sincerely,

Tina H. McCoy, Ed.D.

Beginning with the 2015-16 school year, New Hampshire replaced 11th grade Smarter Balanced Assessment Testing with the SAT. There have been content and design changes to the SAT which affect the way performance is assessed and how results are reported. The former Critical Reading portion of the SAT is now the Evidence-Based Reading and Writing section. This includes the essay portion, which is now optional. The essay is graded with a different scale than the rest of the SAT.
