

Safety & Facilities Update
June 2, 2021 School Board Meeting
Todd Ledoux, Safety & Facilities Director

The Facilities Department continues to follow the reopening plan's cleaning and air quality protocols. We have had no issues with securing supplies for cleaning or personal protective equipment. We are currently attempting to hire additional staff for summer cleaning and maintenance. The summer schedule looks to be full with school sponsored summer programs and the town recreation department running their program out of the middle school.

At this time we are developing the summer cleaning schedule for each building. The elementary school has many classroom moves and the middle school has most of the additional programs, but other than that the schedules will follow previous years' schedules.

We have completed all of the pre-bid meetings for the requests for proposals that we have out for projects. We are potentially looking to complete those projects this summer. We did not have a large turnout for these meetings which may negatively impact the amount of competitive bids we receive. We are looking forward to wrapping up this year and getting the summer work underway.
