# GoGuardian Teacher

view students screens in real time,  
close tabs, and send direct private  
messages

Scenes are designed to give teachers  
added control over students' web  
activity during classroom sessions.

Scenes can either be a **Blocked Websites List** (where all websites are allowed except the websites on your list) or an **Allowed Websites List**, where all websites are blocked except the sites added to your list

# GoGuardian Teacher

**Student Reports** contain detailed records of an individual student's browsing activity during classroom sessions

**Pie chart graphs of Top Activity** (Websites, Documents, and Google Searches) and time spent

**Detailed, line-by-line records** of student browsing activity

**Interventions, or activity** where a teacher or other school official intervened by correcting a student's activity. This will include:

- The number of times the student's device was locked
- The number of times a tab was opened on the student's behalf
- The number of times a student's tab was closed
- The number of times a student attempted to access a blocked website
